Product description

Smart electromagnetic flow meter is a high-performance, high-reliability flow meter. It used to measure the volume flow of conductive liquid and slurry in closed pipelines. Widely used in steel, electricity, petroleum, chemical industry, coal, metallurgy, papermaking, water supply and drainage, food, pharmaceutical industry, etc.

Working principle

The measuring principle of electromagnetic flow meter is based on Faraday's law of electromagnetic induction. The sensor is mainly composed of a measuring tube with an insulating lining, a pair of electrodes installed by inserting the measuring tube wall, a pair of coils and an iron core to generate a working magnetic field. When a conductive fluid flows through the measuring tube of the sensor, a voltage signal proportional to the average flow rate of the fluid will be induced on the electrode. The signal is operationally amplified and processed to achieve various display functions.

Features

- Measurements are not affected by fluid density, viscosity, temperature, pressure and conductivity.
- No obstacles in the measuring tube, no pressure loss, low requirements for straight pipe section.
- The LCD backlight type converter can be easily displayed and read in the sun or in a dark room.
- In harsh environments, parameters can be set via infrared touch buttons without opening the cover of the converter (need to be customized).
- Flow meter with bidirectional measurement system, built-in three totalizers: positive total, reverse total and total difference.
- It has various forms of output: current 4-20mA, pulse, frequency, rs-485, HART.
- The converter has self-diagnosis alarm output, no-load detection alarm output, flow upper and lower limit alarm, batch control (need to be customized) and other alarm output functions.
- Not only for general processes, but also for the measurement of ore pulp, mud, coal slurry, paper pulp and paste liquid.
- High-pressure electromagnetic flow sensor with PFA lining technology, resistant to high pressure and negative pressure, especially suitable for petroleum, chemical and other industries.
- Explosion-proof instruments can be used in corresponding explosion-proof places.

Technical parameter

Item	Technical parameter	
Main power	AC220V 50HZ/DC24V/DC12V/3.3V battery power supply	
Power consumption	<15W (Supporting power consumption with sensors)	
Display and buttons	Display in Chinese and English, can display instantaneous flow, accumulated flow and alarm display (excitation open circuit alarm, empty pipe alarm, flow over limit alarm). Four membrane touch switches for data setting	
Counter	Forward total, reverse total	
Output signal	Analog output	Two-way, fully isolated 0~10mA/4~20mA Load resistance: 0~1.5kΩ when 0~10mA; 0~750Ω when 4~20mA
	Frequency output	Forward and reverse flow output, the upper limit of output frequency can be set within 1~5000Hz. Open collector bidirectional output of transistor with photoelectric isolation. The external power supply is not greater than 35V, and the maximum current of the collector when it is turned on is 50mA
	Alarm Output	Two-way open collector alarm output with photoelectric isolation transistor. The external power supply is not greater than 35V, and the maximum current of the collector when it is turned on is 250mA. Alarm status: fluid empty pipe, excitation disconnection, flow overrun
	Pulse output	Forward and reverse flow output, the output pulse upper limit can reach 5000CP/S. Pulse equivalent is 0.0001~1.0m³/P. The pulse width is automatically set to 20ms or square wave. Open collector output of transistor with photoelectric isolation. The external power supply is not greater than 35V, and the maximum current of the collector when conducting is 50mA
Matching accuracy	0.5%	
Damping time constant	Continuous variable from 0~100s (90%) time grading optional	
Communication	Optional RS232C or RS485 serial communication interface, HART communication protocol	
Loss of power	The internal design of the instrument has a power-off clock, which can store 16 power-off records (10 years) (need to be customized)	
Protection class	IP65(standard);IP68 can be customized for the split type(only for transmitter).	
Explosion-proof mark	Ex d ia [ia Ga] q IIC T6 Gb
